CLOUD SECURITY THAT MOVES WITH YOU
Cloud isn't just a trend—it's the backbone of modern business. Zentara helps you migrate, operate, and grow securely in the cloud. Whether you're modernizing legacy systems or launching cloud-native apps, our cloud security services protect every step of the journey.

WHY IT IS IMPORTANT
WHY CLOUD SECURITY MATTERS MORE THAN EVER
Moving to the cloud doesn't eliminate security risks—it changes them. Misconfigurations, unsecured APIs, exposed storage buckets, and compliance failures are among the top causes of cloud breaches. Zentara provides the expertise, tooling, and oversight to ensure your cloud migration is secure from day one.
We combine:
→ Security architecture tailored for AWS, Azure, GCP
→ Identity and access management (IAM) best practices
→ Data encryption, backup, and loss prevention
→ Cloud-native development security integration (DevSecOps)
→ Compliance-aligned controls for ISO, NIST, and regional standards
